

CONSTRUCTION NOTICE

Gladiola Street Sewer Rehabilitation

Lane shifts with alternating one-way traffic flow with flagging and temporary traffic lights along Gladiola from 900 S. to 500 S. starting on July 28.

In an effort to accommodate the sewer rehabilitation and maintain traffic flow to businesses, lanes will be shifting to the west side of Gladiola St. from 900 S. north to 500 S. with an alternating one-way traffic flow. Traffic will be directed by flaggers during the day and by temporary traffic lights at night.

Businesses Should Expect:

- Traffic reduced to one lane starting at 900 S. with a flagger and temporary traffic lights alternating traffic flow from north and southbound routes through the work zone.
- Traffic control will continue to shift north toward 500 S.
- Road repair will occur on Friday, July 28 from Director's Row to 900 S. completing the first phase of the project.
- Work is scheduled during daylight hours, Monday through Friday.
- Freight carriers and motorists can expect up to 10-minute delays.
- Notification prior to future road closures.
- Continued water service – no interruptions are anticipated.
- Maintained access to businesses and residences with only brief interruptions.
- On-street parking restrictions.

- Trenching and open pits along Gladiola St.
- Plated access over trenches to businesses and residences.

Construction Details

Crews are repairing the sewer system along Gladiola St. This work will involve pot holing, trenching and pits along the East side of Gladiola St. to allow a slipline (smaller pipe) to be inserted into the existing sewer line.

Project Anticipated Schedule

For your safety and the safety of construction crews, please obey all construction signage and flagging operators.
